PROFESSIONAL SUMMARY

iOS Developer with **1+ years of hands-on experience** in designing, engineering, and maintaining iOS applications using **Swift**, **UIKit**, and **SwiftUI**. Experienced in building production-ready applications using **MVVM architecture**, integrating **REST APIs**, implementing **offline-first architecture**, **Push Notifications**, **Firebase** services, payment gateway integration, **localization**, and **App Store** deployment. Passionate about building scalable, reusable, and high-quality iOS applications while following clean architecture and best development practices.

TECHNICAL SKILLS

Programming Languages: Swift 5+, Objective-C, JSON, XML

iOS Development: UIKit, SwiftUI

iOS Frameworks & SDKs: Foundation, Core Data, Core Animation, Core Graphics, Core Location, AVFoundation, UserNotifications, Combine

Architecture & Design Patterns: MVVM, MVC, Repository Pattern, Singleton, Delegate Pattern

Networking & APIs: REST APIs, URLSession, Codable, JSON Parsing, Postman

Firebase: Firebase Authentication, Cloud Firestore, Realtime Database, Firebase Cloud Messaging (FCM), Firebase Crashlytics

Push Notifications: Apple Push Notification Service (APNs), Firebase Cloud Messaging (FCM)

Payment Integration: Razorpay Payment Gateway, Payment Verification, Payment Status Handling

Database & Local Storage: Core Data, UserDefaults, AppStorage, SQLite

Concurrency: Grand Central Dispatch (GCD), DispatchQueue, Async/Await

UI Development: Auto Layout, Storyboards, XIB, Programmatic UI, Responsive UI, Reusable UI Components

Version Control: Git, GitHub, Bitbucket, Sourcetree

Development Tools: Xcode, VS Code, Jira, Figma, Canva

iOS App Distribution: TestFlight, App Store Connect, Certificates, Provisioning Profiles

Development Methodologies: Agile, Scrum

Additional Skills: Localization, Offline-first Architecture, Background Synchronization, Network Reachability Monitoring, PDF Generation

EXPERIENCE

Junior iOS Developer

Dec 2025 – Present

TMedia Business Solution Pvt Ltd

- Engineered and maintained enterprise iOS applications using **Swift**, **UIKit**, **SwiftUI**, and **MVVM** architecture.
- Built reusable UI components, responsive layouts, and scalable application architecture across multiple product modules.
- Integrated **REST APIs** using **URLSession** and **Codable** for seamless client-server communication.
- Leveraged **Firebase** services, local storage, **Push Notifications**, and application lifecycle management to strengthen app reliability.
- Debugged UI, networking, and business logic issues using **Xcode Debugger** and **Instruments**, reducing production defects.
- Collaborated with cross-functional teams using **Git**, **Bitbucket**, **Sourcetree**, and **Jira**, following **Agile/Scrum** methodology to deliver features on schedule.

iOS Developer Intern

May 2025 – Nov 2025

ImpeedCraft

Bangalore, India

- Developed iOS applications using **Swift**, **UIKit**, **SwiftUI**, **MVC**, and **MVVM** architecture.
- Designed reusable UI components using **Auto Layout**, **Storyboards**, and Programmatic UI.
- Implemented **REST API** integration, **Firebase Authentication**, **Crashlytics**, and **Realtime Database**.
- Established local data persistence with **Core Data** and **UserDefaults**, and managed **TestFlight** distribution, **App Store** deployment, certificates, and provisioning profiles.
- Enhanced application stability through debugging, bug fixing, testing, and performance optimization.

PROJECTS

MazdoorBook ([App Store Link](#))

SwiftUI, MVVM, REST APIs, Firebase, Razorpay

- Architected a production-ready workforce management iOS application from scratch using **SwiftUI** and **MVVM** architecture, now live on the App Store.
- Structured modular architecture across **7 core modules** – Authentication, Attendance, Employees, Payments, Profile, Home, and Super Admin.
- Constructed a reusable networking layer using **APIService**, **APIManager**, **APIEndpoint**, **Codable** models, and **Repository Pattern** for scalable API integration.
- Established secure authentication, session management, **Keychain** storage, **AppRouter**, **AppState**, reusable UI components, and **NavigationStack**-based navigation.
- Enabled **offline-first** functionality with automatic synchronization, **background sync**, and **network reachability monitoring**.
- Incorporated the **Razorpay Payment Gateway** with payment verification, **PDF** receipt generation, receipt sharing, and payment status handling.
- Delivered multilingual **localization** across **4 languages** (English, Hindi, Kannada, Marathi), **Push Notifications**, **Firebase Core**, **Firebase Crashlytics**, **UserDefaults**, and **AppStorage**.

NexusChat

SwiftUI, MVVM, Repository Pattern, REST APIs

- Crafted a scalable real-time chat application from scratch using **SwiftUI** and **MVVM** architecture.
- Shipped **8 core features**, including one-to-one chat, group chat, pinned messages, message forwarding, user mentions, authentication, profile management, and a notice board.
- Organized modular architecture using **Repository Pattern**, Service Layer, reusable UI components, **AppRouter**, and **AppState**.
- Consumed **REST APIs** using **Codable** models within a scalable networking architecture with clean separation of concerns.
- Prioritized reusable components, maintainable architecture, and scalable application design throughout development.

Edification

UIKit, REST APIs, Enterprise Application

- Contributed to a large-scale enterprise school management application created using **UIKit**.
- Executed **REST API** integration, reusable UI components, **localization** support, and **offline-first** architecture.
- Optimized **background synchronization**, **network reachability monitoring**, and production-level bug fixing.
- Refactored **11 modules**, including Homework, Attendance, Examination, Student Progress, Digital Library, Notifications, Lesson Planning, Transport, Sports, Health, and Profile.
- Devised a **face recognition**-based attendance feature, enabling automated and contactless student attendance marking with improved accuracy and efficiency.
- Partnered with team members following **Agile** methodology while maintaining production-quality code.

Vastu-Cite App ([App Store Link](#))

SwiftUI, MVVM, Localization

- Conceived, coded, and published a Vastu calculation application on the Apple App Store using **SwiftUI**.
- Assembled reusable UI components with responsive layouts and clean navigation flow.
- Added multilingual **localization** along with **UserDefaults** and **AppStorage** for local persistence.
- Shaped intuitive calculation screens with production-ready architecture and clean user experience.

EDUCATION

S G Balekundri Institute of Technology

Bachelor of Engineering - Computer Science and Engineering

Belagavi

2021 – 2025 | CGPA: 8.4

CERTIFICATIONS

NPTEL - Programming in Java

ACHIEVEMENTS

Published **2 iOS applications** on the Apple App Store.

Delivered multiple production-ready iOS applications from scratch using **SwiftUI** and **UIKit**.
